

Turn Your Manufacturing Dreams into Reality

Could Augmented Reality and the Industrial Internet of Things (IIoT) play a significant role in the African manufacturing sector? With their application in areas such as smart connected products and operations; these technologies enable manufacturers to have full control of their product development and operations, with the added benefits of reduced costs, improved quality and productivity.

1Worx was founded in 2015 by CEO, Duan Gauché and Chairman Charles Anderson. With a Massive Transformative Purpose of Making African Products and Operations Greater by making them smart and connected, 1Worx focuses on providing the African market with disruptive, tailor-made, IIoT technology that enables innovative solutions with the only modern and complete platform for the Internet of Things, ThingWorx. ThingWorx is the first software platform designed to build and run the applications of the connected world.

1Worx primarily serves the manufacturing sector within the Agriculture, Aerospace & Defense, Transportation, Industrial Equipment, Electronics & High Tech industries.

In a period of just 3 short years, 1Worx has expanded its team from a one-person company to a team of eight including developers, engineers, sales and design. Its focus has been on developing a partner ecosystem to support the diverse challenges that IIoT presents. 1Worx is continuously striving towards building relationships with systems integrators, resellers, programmers and users alike.

Experience the exciting world of
Augmented Reality by simply:

- 1 Downloading the Vuforia View App from your mobile app store
- 2 Scanning the ThingMark
- 3 Immersing yourself in the AR world!
