Sheet Metal Manufacturing

AMM is a small and dedicated group of people with over 10 years of experience in the Aviation manufacturing industry specialising in sheet metal manufacturing and assembly. We are strategically located next to Wonderboom National Airport to support our immediate industry as well as Major Aviation manufacturing companies nationally. Our capabilities include sheet metal deburr, forming with press brake and manual forming machines as well as assembly.

Due to our size and specialisation we are able to support quick industrialisation and our flexibility can deliver steady state manufacturing solutions with short lead times when required.
