

AEROSUD

Aviation Apprentice Training Centre

The Aerosud Group established the first Training school in 1994, and has since steadily increased the capacity and the ability to introduce new courses to support the needs of the company. In total 5 trades are covered at Artisan and Operator level.

The training centre achieved ISOE (Institute of Sectoral or Occupational Excellence) status in 2011 for two Aviation manufacturing trades. The centre is fully approved by SACAA and the Transport Education Training Authority (TETA) and also achieved its certification from QCTO in early 2017.

The Training Centre is a 600 sqm facility – that can accommodate up to 60 students at any given time, creating the opportunity to grow the Training centre further to deliver skilled artisans and operators also to the wider aviation sector in South Africa.
