

AEROSUD

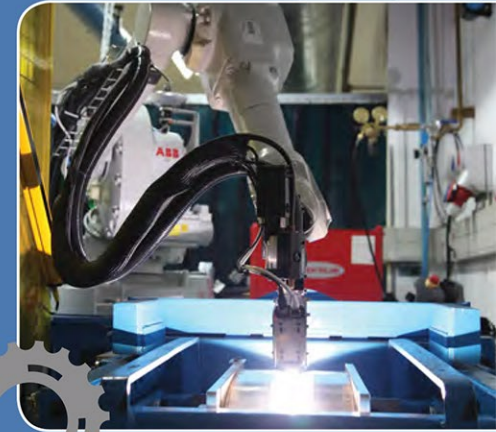

Aviation

Aerosud is an established supplier of aerostructure components as well as aircraft interior systems.

As a smart supplier using cutting edge technologies, Aerosud is able to offer product development and qualification, short and complex industrialisation, on time delivery, unquestionable quality as well as supply chain collaboration. These, together with the in-house availability of multiple manufacturing technologies, enables Aerosud to provide a competitive total cost of business solution.

With research and development focused on complex metal and thermoplastic forming, additive manufacturing and manufacturing techniques for complex composite structures, the use of state of the art manufacturing solutions is ensured.

These innovations together with collaboration in advanced manufacturing and other Industry 4.0 initiatives guarantees the continuation of our world class value offering and constant strive to be an ever flourishing company.
