

# LOGO PUNCH

## ENGINEERING & ENGRAVING

Logo Punch and Die was established in 1994

Their business plan is simple but effective, quality engineered products, professional service and exceptional after sale service .A plan that has evolved Logo Punch from a humble beginning to one of the leading engineering establishments in South Africa with a BEE level 4 clearance.

### Logo Punch offers these exceptional services:

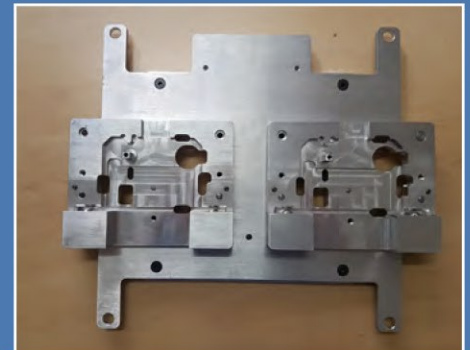

All general engineering like CNC precision Milling & Machining, 4th Axes Machining, CAD Design, Tool Design & Manufacture

The services offered include:

- Jig & Fixtures,
- CNC Machining,
- 3-Axis Vertical CNC machining
- 4-Axis Vertical CNC machining
- CNC Turning
- Tool and Die Making
- All other types of general engineering.

Working with a range of materials: aluminum, brass, steels, and stainless steels. Logo punch can offer their customers a complete service including welding, fabrication and finishing which enables them to offer a complete solution.

Finishing services include painting, anodizing, alocroming, zinc plating and other finishes as required. Logo Punch will fabricate and assemble jobs as specified, sourcing proprietary components and fittings where necessary.
