

# Pacific X Capital

Pacific X Capital is a South African company that offers financial services and enterprise development. Young people are at the fore front of our business as the target and main focus because we understand that young black youth are the future. We develop and startup businesses that wish or are participating in the manufacturing industry. South Africa should come to a point where it no longer needs to import, everything that we do should be done in Africa. Pacific X Capital works on building Africa to be a world class continent that can depend on itself and run by itself. With the help of prudent entrepreneurs that are aiming to industrialize, we are propitious to go the extra mile in developing and financing them.

We eradicate the red tape and support business owners to accelerate their goals for the venture through this program. Pacific X Capital – Where corporate relationships are nurtured
