

Ti-TaMED

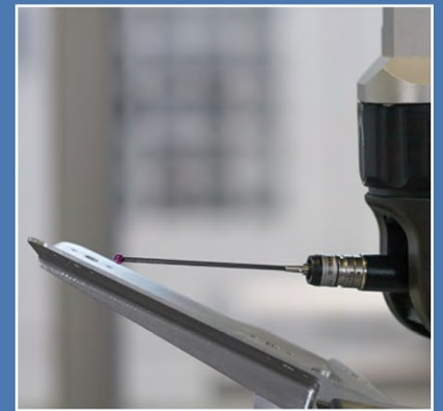

(PTY) LTD

Ti-TaMED (Pty) Ltd is an AS9100 RevD accredited company, which specializes in high precision engineering with exotic materials such as titanium, super invar, inconel, stainless steels, nitronic, aluminium and high performance polymers. Established in 1996, with certifications in ISO13485 MDD 93/42/EEC and ISO9001, Ti-TaMED is dedicated to quality manufacturing in critical sectors including the Medical, Marine, Aerospace and Aviation.

Ti-TaMED's machining capabilities include:

- CNC Mills – 3, 4, and 5-Axis
- CNC Lathes
- CNC Multi-Axis Turning Centers
- EDM Wire cutting
- Conventional machining
- Laser Marking
- Engraving
- Sand blasting
- Polishing
- CMM Measuring

Ti-TaMED's aerospace and aviation portfolio includes OEM manufacturing for international and local companies producing turbine blades, satellite CubeWheels, optical components, radio communication components, satellite optics, satellite componentry and sub-contracting the manufacture of certain components for Aerosud's Airbus projects.
