

We are experts in all aspects of business systems implementation. We design To-be Business Process Blueprints; we project manage complete ERP and similar business system implementation projects; and we plan and manage large scale people preparation programs to transition the human capital through a discontinuous change event such as Go-live.

iPlan has a track record of projects in manufacturing plants, warehouses, distribution centres, mines, farms, saw mills, pack houses and retail outlets; in supply chains for luxury goods, pharmaceuticals, chemical products, food and beverages, agricultural products, construction and aviation.

We literally wrote the book on ERP strategy: 'Thinking about ERP - the Executive's guide to setting strategy for selecting, implementing and operating ERP' can be bought as a Kindle electronic book from Amazon.
